

Learning Friends: Bug Discovery

Tiger and Monkey are in the park searching for bugs! Find and circle the bugs in the park, that match from the pictures Tiger and Monkey have in their field journal.

A snail carries its home on its back, and can curl up inside of it if it needs to protect itself!

A spider is an arachnid. Arachnids have 8 legs. Many spiders weave sticky webs to catch insects for food.

A ladybug is an insect. Insects have 6 legs and a pair of antennae.

A centipede has many legs, and likes to live in dark, damp places.
