

Leo's Field Diary

Leo found a monarch caterpillar egg and wrote about its life stages in his field diary. Fold the field journal on the next page, and then help Leo complete it by cutting and pasting his drawings on the right pages.

2. The egg hatched into a caterpillar.

3. The caterpillar attached to a twig. It grew a hard covering. It was a chrysalis.

4. The chrysalis opened and a butterfly came out.

FIELD DIARY

1. The butterfly started out as an egg.
